Dmitrii Blokhin

Automation Fanatic | Nighttime Funk Explorer
Orihuela, Valencian Community, Spain

Summary

I'm an Automation Fanatic with 4+ years of experience in the real
estate sector, where I started in an administrative role—but quickly
realized I could bring tech to the table. During that time, I developed
and maintained WordPress websites, automated repetitive workflows
with Python, managed databases (SQL), and created XML-PHP
converters to integrate property data across platforms.

Over the years, I turned routine administrative tasks into
opportunities to streamline processes and optimize efficiency. I
handle data in SQL, XML (yes, still! — why doesn't real estate just
use JSON?), JSON, and APIs, and I'm constantly learning to apply
these skills in larger-scale tech projects.

Outside of work, I'm a Nighttime Funk Explorer — a multi-
instrumentalist and self-producer who channels creativity into
music, and a fitness enthusiast, certified as a Fitness Monitor and in
Functional Training. I apply the same discipline, focus, and problem-
solving mindset to coding, music, and fitness alike.

Tech Stack:
Python · WordPress · Selenium · Pandas · Pywinauto · Django
(learning) · SQL · XML · JSON · Git · HTML/CSS · Photoshop

I'm now looking for a role where I can leverage my hands-on
automation experience, problem-solving skills, and passion for
building tools that make life easier.

Experience

GRUPO TERRASUN SL
Web Product Administrative
July 2021 - Present (4 years 3 months)
Alicante, Valencian Community, Spain

- Automate repetitive admin workflows using Python increasing operational efficiency.

- Design and deliver internal tools and scripts to streamline tasks such as document generation, data scraping, and photo processing.

- Produced visual content, edited photos, and created videos for internal and client-facing use.

- Built XML-PHP converters to integrate and synchronize real estate property data across platforms.

- Use JSON and SQL to manage and transform structured data across systems.

- Design newsletters with branded content layouts.

- Transformed an administrative position into a tech-driven role, applying automation, coding, and process improvement to day-to-day operations.

Freelance
Internet Safety Assessor
March 2020 - December 2024 (4 years 10 months)

- Evaluated video content for policy compliance, contributing to AI-powered content moderation systems.
- Identified and flagged unsafe, harmful, or non-compliant material with precision and consistency.
- Provided detailed feedback to improve machine learning models for automated content detection.
- Adapted to evolving content policies and maintained high standards in quality control.

Appen
Web Search Evaluator
April 2017 - February 2019 (1 year 11 months)

- Analyzed and rated search engine results to improve algorithm accuracy and relevance.
- Applied linguistic and cultural knowledge to assess query intent and content quality.

- Delivered high-quality labeled data used for training and validating AI search models.
- Followed strict evaluation guidelines to ensure consistency and reliability.

Education

Moscow State University of Transport (MIIT)
Engineer's degree, Architectural and Building Sciences/
Technology · (2006 - 2011)

Universitat d'Alacant
Master's degree, Geological/Geophysical Engineering · (October 2013 - July 2016)

CEINPRO
Applied Machine Learning , Information Technology · (January 2023 - March 2023)

CEINPRO
Big Data Architecture, Information Technology · (May 2022 - July 2022)

Music Studies
Music · (September 1998 - August 2005)
